## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims 6-10 and 13 drawn to an invention nonelected with traverse. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 12 is finally rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim still refers to "a handle portion" instead of -- the handle portion --, thus it still twice claims the same element.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3, 11 and 12 are finally rejected under 35 U.S.C. 102(b) as being clearly anticipated by any of Smith or Chang as all the broadly claimed structure is present in all the references.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-5, 11 and 12 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Layton et. al. in view of Chang.

Layton et. al. shows the claimed invention except for the use of a reversing mechanism to change direction of rotation. Chang suggests that a driver having ratcheting rollers can also be made reversible by use of a lever. It would therefore be obvious to one skilled in the art at the time the invention was made to modify Layton et. al. by using a reversing lever to change direction of rotation because Chang suggests the use of such a mechanism in roller clutch types of wrenches.

***Response to Arguments***

8. Applicant's arguments filed 21 March 2005 have been fully considered but they are not persuasive.

The question of whether claim 11 is generic or not is moot as there is no election of species, but a restriction between two inventions. Claims 6-10 and 13 are clearly to a different invention and are restricted out.

Claim 12 still contains language that renders it indefinite, however it is assumed that the handle portion referred to is that of claim 11, not an additional one.

Art Unit: 3723

Applicant's remarks with respect to the rejection of claims 1-3, 11 and 12 under section 102 are not persuasive as what the wrench operates on is not a patentable limitation as only the wrench is claimed. Further, the claims are of such breadth that the remarks are more specific than the claimed limitations.

With respect to the rejection under section 103, clearly Layton et. al. shows engaging the workpiece with a roller clutch mechanism and Chang provides one skilled in the art with the suggestion to make such a mechanism reversible.

### ***Response to Arguments***

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
